

Frequently Asked Questions About FIRST AID FOR PETS

Enhance First Aid for Pets is a versatile, gentle, holistic first aid solution safe for use on pets. Available in two versions: one for Dogs and one for Cats, it is made with pure, organic ingredients that combine calming, soothing relief with natural healing power.

Enhance First Aid for Pets has many suggested uses, including:

- Ear Care: helps fight yeast infections, swimmer's ear and makes a terrific general cleaner/deodorizer
- Soothing relief for itch, pain and swelling due to bug bites, hot spots and minor cuts or wounds
- Healing after-care following tick removal
- Relief from itchy allergy rashes
- Cooling, cleansing foot wash and deodorizer
- Relief from the irritation of acne and ingrown hairs

What are the ingredients?

Aloe Vera – (Sourced in USA) Reduces inflammation, decreases swelling and accelerates wound healing. Aids in keeping the skin supple and relieves itching due to insect bites and allergies. Helps increase the availability of oxygen to the skin and increase the synthesis and strength of tissue.

Witch Hazel – (Sourced in USA) Possesses anti-inflammatory properties, helps stop bleeding, eases pain and itching, creates a barrier against infection, and speeds healing.

Lavender Essential Oil – (Sourced in USA) Provides a fresh, calming aroma, aids in wound healing and rejuvenates the skin. *NOTE* FIRST AID FOR DOGS CONTAINS LAVENDER ESSENTIAL OIL; FIRST AID FOR CATS DOES NOT. ESSENTIAL OILS CAN BE TOXIC FOR CATS.

What if my pet licks the area where this product is applied?

The ingredients in Enhance First Aid for Pets were selected because they are safe even if ingested by pets. We have used food-grade, organic Aloe Vera and alcohol-free Witch Hazel. While Witch Hazel can be taken internally, the distillate preparation used in Enhance First Aid for Pets is for external use; however, because it is alcohol-free, a small amount licked off by your pet will not cause harm. Lavender may also be taken internally, although preferably not in the essential oil form; however, the quantity of oil present in our formula is quite small and will not harm your dog if licked off in small amounts. **If you have a cat, please look for *First Aid for Cats*, which does not contain any essential oils.**

Will this product hurt my pet?

Enhance First Aid for Pets does not contain alcohol and therefore will not burn, sting, bubble or otherwise irritate your pet's skin or ears. Our extremely gentle formula is designed to soothe and comfort without any pain.

Can I use this product on myself?

Enhance First Aid for Pets is perfectly safe and effective for use by humans. Try it for poison ivy/oak rashes and mosquito bites, as well as minor burns, cuts and scrapes.
